

(U//FOUO) Menwith Hill Internet Challenge

FROM: Charlie Speight
SID Internet Program Manager
Run Date: 03/19/2004

FROM: Charlie Speight
SID Internet Program Manager

(U//FOUO) [Menwith Hill Station](#) is celebrating its new Internet capability with an analyst challenge and a party as the reward.

(C) With funding support from SID SIGDEV, MHS/Ops was able to purchase the necessary equipment and install workstations to access the Internet "non-attributively" across a dedicated leased line. MHS/Ops currently has 8 workstations servicing 30 accounts, but within 3 months another 33 workstations will be installed to accommodate a "pent-up demand" of 50-60 accounts.

(U) The Challenge

(C) The first MHS analyst or team of MHS analysts who use the new non-attribution Internet capability to significantly further MHS SIGINT knowledge and/or enable a MHS-specific, or a MHS mission partner's SIGINT success, will be rewarded with a party thrown in their honor. The achievement(s) and/or new discoveries must be something unique and deemed operationally significant by a team of MHS DO Technical Leaders. Ops Chief Mike Del Vecchio and [REDACTED] will host the party.

(U//FOUO) The Menwith discoveries (and winners) will be posted on the [SID Internet Program website](#) and the ["Success Stories" page](#).

"(U//FOUO) SIDtoday articles may not be republished or reposted outside NSANet without the consent of S0121 ([DL sid_comms](#))."
